# Environmental Management Policy

## 1. Introduction

360 Water Pty Ltd acknowledges that our business operations have the potential to impact the environment, including contributing to climate change. We are committed to addressing both legal and moral obligations to mitigate environmental damage, deterioration, and climate change effects.

## 2. Compliance and Commitment

Our Company is dedicated to complying with all relevant environmental management legislation and regulations, including those addressing climate change. We will continuously update our practices in response to evolving legislation and emerging environmental standards.

## 3. Management Responsibilities

Managers and Supervisors are responsible for integrating environmental protection and climate change mitigation into the planning of all work processes. They will strive to improve environmental and climate-related performance by adopting updated methods and activities.

## 4. Key Environmental and Climate Considerations

We will prioritize the following environmental and climate-related issues:

**Pollution Prevention:** Prevent pollution of the atmosphere, land, and immediate surroundings where our operations occur.

**Climate Change Mitigation:** Take proactive steps to reduce our carbon footprint and greenhouse gas emissions, contributing to climate change mitigation.

**Waste Recycling:** Wherever possible and practical, recycle waste to minimize environmental impact and reduce greenhouse gas emissions from waste disposal.

**Responsible Waste Disposal:** When recycling is not feasible, ensure that waste is disposed of in a manner that protects the environment and reduces climate impact.

## 5. Employee Responsibilities

All employees are responsible for protecting the environment and addressing climate change. They should take immediate action to minimize environmental impacts and carbon emissions. Employees are encouraged to suggest improvements to current practices that support environmental protection and climate change mitigation.

## 6. Continuous Improvement

We will regularly review and enhance our environmental and climate management practices to ensure we meet our commitments, adapt to new environmental challenges, and contribute positively to climate change mitigation.
